Transform homes with Geo-panel® - from Freefoam Building Products

A clean and modern design option, the Geo-panel® panelling system can be fitted to any interior wall to quickly and easily refurbish and restyle bathrooms, kitchens, utility rooms - and even home offices!

The Geo-panel® range includes a wide variety of colours and textures, from classic marble and traditional white gloss tiles through to contemporary quartz and matt concretes. For a perfect finish, choose from our ceiling panels and our collection of high-quality PVC and aluminium trims.

Our **Premium Wide** panels are an impressive 10mm thick - and at 1000mm wide and 2400mm long can complete a shower enclosure with just 2 panels.

Meanwhile, our **Classic Slim** panels are 250mm wide and 2700mm long, with a 4000mm option in traditional white gloss - ideal for larger scale home projects or ceilings.

The tongue-and-groove PVC panels are **quick and easy to handle and fit**, designed to slot together in moments. They can be applied over practically any surface (including existing tiles!) with almost no preparation, providing a hygienic and fully waterproof finish, with no grouting required.

What's more, Geo-panel®'s surface is wipe-clean, requiring little-to-no maintenance - and **guaranteed for 5 years**.

GE7SMC | Silver Metallic

Our new gloss tile finishes now feature a routed '3D' groove for an authentic grouting effect. They look and feel just like tiles and come in three Premium options - see p7 for more.

Visualise your designs

Use our online Visualiser to experiment and play with different styles, finishes and colours of Geo-panels! Choose one option for your shower unit, and contrast with another for your bathroom walls.

Find the design that works for you at [freefoam.com/geopanel-visualiser](https://www.freefoam.com/geopanel-visualiser)

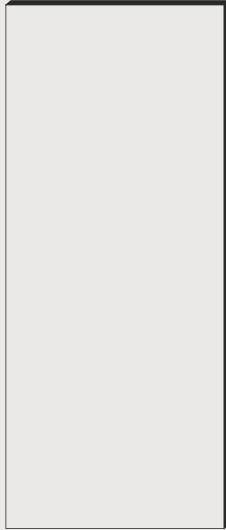

Fitting instructions are available on our website or go to p11 to scan the QR code.

Premium Wide Panels

Panel Size:

1000mm wide x 10mm thick x 2400mm long

Just 2-3 panels from our durable premium range can be used to cover a shower enclosure, allowing you to use a contrasting design for bathroom walls.

Or create the ultimate wet room panelling all walls with the same (100% waterproof) finish.

Choose from 15 high-quality options including contemporary matt concretes, classic marbles or diamonds, or new finishes including Grey Quartz Matt, Grey Azure Matt and glossy tile effects. Our tile finishes now feature a routed groove for an authentic grouting effect, so they look and feel like tiles - but are far easier to fit and maintain.

Classic Slim Panels

Panel Size:

a 250mm wide x 5mm thick x 2700mm long

b 250mm wide x 5mm thick x 4000mm long

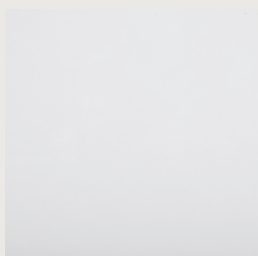

Our classic range is ideal for walls and ceilings on any home improvement project, whether kitchen, bathroom, utility room or home office. Refresh and upgrade interiors in hours and enjoy for years to come.

Available in traditional glossy white - with a 4000mm long option for larger scale projects - as well as diamond, and natural marble effects.

Ceiling Panels

Panel Size:

a 200mm wide x 6mm thick x 2700mm long

b 200mm wide x 6mm thick x 4000mm long

c 250mm wide x 5mm thick x 2700mm long

Forget about plastering over cracks or painstakingly painting ceilings. You can create a bright, attractive ceiling with a seamless finish in a matter of hours with our ceiling panels. Low maintenance and easy to clean, they're guaranteed to stay looking good for 5 years.

Our premium ceiling panels feature two silver strips for a contemporary cladding effect, and are slightly thicker at 6mm, available in 4000mm or 2700mm long panels, both 200mm wide.

Our standard panel is available in a classic white gloss featuring a grouted silver strip/edge, as a 2700mm panel, 5mm thick and 250mm wide, for easy handling and fitting.

For a more unique look, you can use any panel from our Premium or Classic ranges on your ceilings!

Finishing Touches

Our range of trims give a neat, clean edge to your wall and ceiling panels for a stylish and practical look. Available in durable aluminium with a choice of White or Bright Silver Chrome for our Premium Wide Panel range, or in White or Silver PVC for our Classic Slim Panel range.

Fit our internal and external corner trims before the panels are installed, to perfectly finish 90° corners.

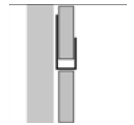

Internal and External Corner Trims

Finish 90° corners with a choice of trim, fitted before the panelling is applied.

End Cap U Trim

Use to start or finish any wall or ceiling panel installation.

H Joint/Décor Strip

Use to join panels side by side for stacking. Gives a white or silver décor strip between panels.

Scotia Moulding

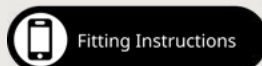

Use to finish the corner between wall and ceiling or floor and wall.
